A “cream of the crop” embryo package. Dirigo Forceful was used for a long time on one of the largest beef producing outfits in the Highland industry. Thorbardin Ranch was very critical and selective with their bulls. Forceful is a direct descendent of Ben Eniglair of Scone Palace, a famous Scottish bull. The dam, Marigold was a yellow cow, who originated from the Pacific Northwest and was purchased by Thorbardin to add growthy grass fed animals. Thorbardin was particularly selective when it came to new female genetics, so we know this cow was a keeper.

The HCF will pay for DNA parent verification prior to calf registration. Lot includes three grade #1 or #2 embryos to be sold as a package; fair market value is \$1200. Purchase price in excess of FMV is tax deductible as permitted by law. Buyer pays shipping and must take possession within 60 days of the purchase. The dam, Ashley, originates from one of the oldest Highland herds in the country, Big Sky Highlands (AHCA Member #752) of Montana. They are known for raising quality Highlands. Ashley is a proven dam and has a daughter who was an Elite Impact Dam, which would be a half sibling to these embryos.
