LOT #28 WL GENESIS (ET,D) SEMEN

Registration # 59,067

Color: Silver

Date of Birth: 04/18/18

Sire: Angus 8th of Dunvegan (D)

Dam: Black Watch Portia (ET,D)

Consignor: Windland Flats Princeton, MN
 info@windlandflats.com 763-260-1001

Introducing the first public sale of semen from this power-packed bull. WL Genesis (ET, D) is a Scottish-style, silver bull, who is the son of Angus the 8th of Dunvegan, whose semen was imported from Scotland. Angus was an extremely long bull who was a great representative of Scottish character. It was said that it looked like he had an extra rib when you would see him in person because of how long he was. Genesis' dam is Black Watch Portia, a fancy silver cow that was shown extensively, who also boasts a strong genetic background. Her sire was the 1996 NWSS National Champion, Gilchrist's Kodiak, and her dam is Four's Emma, who boasts a long line of quality animals. Genesis was 70 lbs. at birth, 725 lbs. at one year old, 1,145 lbs. at two years old and currently weighs 1,560 at 34 months. This is on a grassfed beef producing operation; not a show fed bull. His mature weight will probably be 1,900 – 2,000 lbs. at five years old. His 2020 calf birth weight averages were 68 lbs. for bulls and 65 lbs. for heifers. These weights included first calf heifers and mature cows. His calves have been extremely square with good feet and legs and tons of Scottish character. Extremely docile, he scores a 1 on the docility scale (1 is the top ranking). Silver is one of the hardest AHCA-recognized colors to breed for and finding a bull with these genetics and Scottish heritage in a Silver color is almost impossible to find. Be the first to own WL Genesis' semen from Windland Flats.

There is one lot offered of 5 straws.

Buyer pays shipping costs and must take possession within 60 days. Shipping is arranged between buyer and seller with buyer responsible to pay for shipping.
