## FROZEN SEMEN EVALUATION

Bull: Almosta Farm's Samuel

Stud Code: 179SH00026

Reg #: 45110

Unique ID/Tattoo #: N/A

Collection Date: 5-23-11

Extender: eyt (egg yolk tris)

# Units examined: 2

Type of Unit: 1/2 cc

Thaw Temperature/Time: 37° C/ 1 minute

Client: Valerie White

Concentration: (concentration counts are run on a nucleocounter; objective measurement)

# cells/mL =

# cells/straw = 50

Post Thaw Viability: (% Motile)

Zero Hours = 65%

Incubation = 62%

Time Incubated = 2 Hr

Morphology:

Normal % = >80%

Abnormal %: Primary = Secondary =

### Conclusion

Evaluations in laboratory attempt to predict semen performance in artificial insemination & embryo transfer. These evaluation reports should not be used as legal documentation certifying or condemning fertility. It is a resource for knowledge utilization to discourage using potentially inefficient frozen semen in the industry.

- This collection date sample meets the minimum standards of this lab.
- This collection date sample failed to meet the minimum standards recommended by this lab.
- This collection date should not enter into the industry market.
