Cloud 9 semen is limited, as the bull is deceased. Our calves from him this year have been lively, smart, friendly, and moderate in terms of birth weight. His semen has been exclusively used by Star Lake Cattle Company and Four Starr Genetics prior to this public offering. Cloud 9 was homozygous black, meaning he cannot throw red or red-based progeny. He was used largely in the IX Ranch cross-breeding program before they downsized. He was easy-fleshing, had good feet and legs, and did an excellent job covering cows in big, rough pastures. He will make unique black, dun, or silver calves for you! Ships from ORIdgen, Huntley MT.

There are two lots offered of 5 straws each. Buyer pays shipping costs and must take possession within 60 days. USA only

Five straws of heifer sex-sorted semen that is CSS qualified for export. WL Genesis is the son of Angus 8th of Dunvegan. Angus semen was imported from Scotland. He was an extremely long bull who was a great representative of Scottish character. Genesis' dam is Black Watch Portia, a fancy silver cow that was shown extensively, Genesis was 70 lbs. at birth, 725 lbs. at one year old, and currently stands at 1823 lbs. at four years old. This is on a grass-fed beef producing operation; not a show fed bull. His 2020 and 2021 calf birth weight averages were 67 lbs. His calves are extremely square with good feet and legs and tons of Scottish character. Extremely docile, he scores a 1 on the docility scale (1 is the top ranking). Silver is almost impossible to find, and even harder to find in this quality of an animal. Shipping charges are the responsibility of the buyer and must take possession within 60 days. Buyer can also double their final winning bid and receive two of these packages. There are more pictures and information about WL Genesis on HighlandGenetics.com. If you are outside the USA and within a CSS-qualified country, please contact us about bidding before you bid as some countries may require additional import fees.

Your National Champion Bull at NWSS 2022, the judge called him a “breed-changing bull.” Hickory was undefeated in the show ring as a two-year old, and is just as impressive in his every-day clothes on the ranch. Hickory is stocky and moderate framed with good heritable beef characteristics. Weighing in at 1743 pounds in Denver, his rib-eye area was 19.74 — over a square inch larger than the Reserve Champion Bull. His sire was a good-footed, easy-doing bull with limited AHCA progeny due to being used primarily for cross breeding while he was alive. Hickory’s dam is a favorite with an excellent udder and genetics that go back to the first Highland Spice herd. Hickory has been sweet and easy-going since birth - a trait we see in all the Uallach Dubh 6th progeny we have had. Hickory semen will be offered exclusively by Highland Spice until 2024. This is the last public offering this breeding season. Semen is heifer-sexed, 1/2 cc straws, 4M concentration. Collected and stored at ORigen, Huntley MT. Buyer must have approval from Sexing Technologies to use this semen for IVF/ET fertilization. Contact your ET center or Seller for more information. There are two lots offered of 5 straws each. ### LOT #50 SNOWLAND JENNY EMBRYO FLUSH

Snowland Jenny

#57,325

Consignor: Cheesehead Highlands  
brandonvolstad@hotmail.com

Burlington, WI  
262-758-2326

Here is the first public opportunity to purchase genetics from the 2021 ROE cow of the year! Snowland Jenny won 3 grand champion cow/calf titles (and another class winner) with CZH Daddy Issues at her side in 2021. Her calf won her division 4 times in 2021, and was also a class winner at the NWSS. A cow I purchased 4 years ago from the

NCHCA sale, I chose her for her unquestioned femininity, structural soundness, and incredible demeanor. Jenny has a top-notch udder, which received compliments from every judge as being excellent, including at the NWSS the judge noted she had the best udder in the class. This is a cow with a pedigree unique enough to breed to any of the top highland bulls of today, the design to calve and move freely well into her teens, and a tight, correct udder that will stand the test of time! A minimum of six (6) grade #1 embryos are guaranteed to the buyer. In the event the chosen cow does not produce a minimum of six embryos, the buyer will have the option of flushing the cow again until the minimum and only the minimum of six embryos is achieved or the buyer may have the option of a prorated price per embryo based on purchase price at the NCHCA Sale. This settlement will be handled only through the buyer and seller. If the chosen cow produces more than six embryos, all embryos will be the property of the buyer. Consignor will choose the embryo technician and location for flushing. The buyer will be responsible for expenses associated with the flush. The sale of flush rights is a transaction between buyer and seller only. AHCA Rules and Regulations apply. A flush rights contract will be signed by consignor and buyer after the sale that defines and guarantees terms and condition of flush. Seller requires flush to happen on or before December 1, 2022.
