This is to certify that on 2/10/25, semen from the 2 yr. old Highland  
(Date) (Age) (Breed)

Sire TJH Big Chumpus having a X cm. scrotal circumference was examined for breeding soundness. Unless other wise indicated, this bull has been examined only for quality of semen. No special diagnostic tests were made for possible venereal disease or other infection.

Interpretation of data resulting from this examination would indicate to the best of my knowledge, on the aforementioned date, that this bull is a:

- Satisfactory Potential Breeder
- Questionable Potential Breeder
- Unsatisfactory Potential Breeder

Remarks: semen quality  
only
