Subject: Semen evaluations.

Here is the evaluation on the semen that we checked yesterday.

Semen Quality Control Evaluation

Bull Identification	0 Hr.	3 Hr.	Morphology (%)				Comments
	Motility	Motility	1 Abn	2 Abn	3 Abn	Normal	
071SH0001 GOF XERXES 2X 5191 90.03.21	58	56	16	6	2	76	(1)

(1) Semen quality is normal on all parameters evaluated.

RMSS makes no assumption as to the fertility of any "non-RMSS" semen evaluated. This semen was only evaluated for the parameters listed.
